

The Still-Forgotten Obama Lie

by Nick Chase

onashi@charter.net

May 14, 2013

"Benghazi-gate" -- "IRS-gate" -- "AP-gate" -- it would seem the intrepid investigators in the dinosaur media are finally catching up to the truths known months or years ago to those of us who get our news from the Internet, in an effort to repair their shredded reputations. IRS targeting "patriots" -- not a problem for the dinosaurs, those racist lovers of the Constitution deserved it. Hillary, Susan and crew covering up the Benghazi terrorist attack with a bald-faced lie about a video trailer -- the dinosaurs had no problem swallowing this lie until the whistleblowers made it apparent what fools they were for doing so, then they had to quickly recoup. But the Obama administration sucking their vitals from the *Obama-friendly* Associated Press -- well, that hurts them directly. They're under attack! Unforgivable!

Hey, dinosaurs, now that we have your attention, we have a hot tip for you: There's one big Obama lie that's two years old that you completely missed -- in fact, you *suppressed* the truth. And you don't have to dig very hard to find this lie; it can still be downloaded at any time from whitehouse.gov for your own inspection and analysis. It's the Obama long-form "birth certificate" forgery.

That this digital document is a forgery has been proved beyond question. Various experts have proved its fakery on different levels:

- Photoshop author and instructor Mara Zebest (along with other researchers) has shown how this digital fake was constructed in Photoshop from digital snippets of images. (My favorite is that Photoshop reveals the Alvin T. Onaka rubber-stamp image was scaled 24% and rotated 90 degrees counterclockwise before being added to the fake.)
- Typographer Paul Irely has demonstrated that typefaces from at least three different typewriters were used in constructing this fraud.
- The only official government investigations of this fake, by Arizona Sheriff Joe Arpaio's investigators, concluded that the digital Obama "birth certificate" is definitely a forgery (along with Obama's draft card).
- I have shown how the supposedly-typed letters in the forgery fail to line up vertically, as they must in a genuine typed document; and how the mother's signature, "Stanley Ann Dunham Obama", was composed of three different handwritten images, each made with a different pen. (To see my research, look for "Nick Chase" in the archives by author on the *American Thinker* website, and the articles will pop up.)

So the conclusions of the experts are definitive: It's a forgery. If you have not yet recognized this truth, then you are waiting for *acceptance* -- for a lot of people to agree

with you -- so you won't be attacked as a raving lunatic should you dare to bring up the subject.

Now, the arguments for forgery at the Photoshop level can be a bit hard to follow if you're not computer-ept. Your 12-year-old nephew will understand them completely, but granny -- or dinosaur journalists who are around Dan Rather's age -- may not.

The arguments for letters lining up vertically, or for differing typefaces, may require you to have spatial perception. Not everybody does; for dinosaur journalists, high-school geometry might not have been one of their strong subjects.

But almost everybody can understand what you see below, in Figure ULC, the upper left corner of the PDF-image forgery:

The image shows a close-up of the upper left corner of a document that is a forgery of a birth certificate. The document is on green security paper. At the top, it says "STATE OF HAWAII" and "CERTIFICATE C". Below this is a form with several fields. Field 1a is "Child's First Name (Type or print)" with the name "BARACK" typed in. Field 1b is "Middle Name" with the name "HUSSE" typed in. Field 2 is "Sex" with "Male" typed in. Field 3 is "This Birth" with "Single" checked and "Twin" and "Triplet" unchecked. Field 4 is "If Twin or Triplet, Was Child Born" with "1st", "2nd", and "3rd" options, all of which are unchecked. Field 6a is "Place of Birth: City, Town or Rural Location" with "Honolulu" typed in. Field 6c is "Name of Hospital or Institution (If not in hospital or institution, give address)" with "Kapiolani Maternity & Gynecological Hos" typed in. Field 7a is "Usual Residence of Mother: City, Town or Rural Location" with "Honolulu" typed in. Field 7b is "Street Address" which is empty. The form is numbered 1a, 1b, 2, 3, 4, 6a, 6c, 7a, 7b, 7d. The text and lines of the form bend downward, which is a sign of forgery.

1a. Child's First Name (Type or print)		1b. Middle Name	
BARACK		HUSSE	
2. Sex	3. This Birth		4. If Twin or Triplet, Was Child Born
Male	Single <input checked="" type="checkbox"/> Twin <input type="checkbox"/> Triplet <input type="checkbox"/>		1st <input type="checkbox"/> 2nd <input type="checkbox"/> 3rd <input type="checkbox"/>
6a. Place of Birth: City, Town or Rural Location			
Honolulu			
6c. Name of Hospital or Institution (If not in hospital or institution, give address)			
Kapiolani Maternity & Gynecological Hos			
7a. Usual Residence of Mother: City, Town or Rural Location			7b.
Honolulu			
7d. Street Address			

Figure ULC. Upper left corner detail of the Obama PDF-image "birth certificate".

The public was essentially told that Hawaii Department of Health officials took a bound volume of original paper 1961 birth certificates, turned to Obama's, placed it on the copier, copied it onto green security paper, stamped and embossed-sealed it, then delivered it to Obama's lawyer to be flown back to Washington. In which case, the "birth certificate" must be fake -- because near the left margin, especially at the top of the document, the text and lines of the form bend downward (to simulate the bending of the page near the binding). There isn't a copier in the world that will bend an image like that, even when the paper curls away from the glass. (If it did, the manufacturer would quickly go out of business.)

And the Obama re-election campaign had the brass to put this image on T-shirts and mugs it was peddling, preserving for all time this momentous fraud. In your face, you dumbass dinosaur journalists! You didn't even notice! How's them apples?

OK, which one of you will be the first to break the ice and tell the truth? I double-dare ya!

About the author: Nick Chase is a retired but still very active technical writer, technical editor, computer programmer and stock market newsletter writer. During his career he has produced documentation on computers, typewriters, typesetters, headline-makers and other pieces of equipment most people never heard of, and he has programmed typesetting equipment. You can read more of his work on the *American Thinker* website and at contrariansview.org.
